About me

I am a full-stack software developer with four years of work experience who combines technical and user-centered thinking and moves naturally between development and design.

Languages

Finnish - native
English - fluent
Swedish - good

Work experience

IT Consultant, Evitec Solutions (2022–)

I develop all parts and stages of software and take responsibility for maintenance work. I design, test, and document software in fintech client projects. I also do UX/UI design.

Teaching Assistant, Tampere University (2021-2022)

I planned, taught, and supervised weekly exercise lessons, guided students in their course projects, and graded course projects. (Introduction to Signal Processing, Software Design)

Process Operator, Boliden Kokkola (2019-2021, summer trainee)

I was responsible for supervising production operations in a zinc factory, collecting samples, and ensuring high quality of product. I worked as a summer trainee in 2019, 2020, and 2021.

Education

Master of Science in Technology, Tampere University (2021-2025)

Information technology, major in human-technology interaction, minor in software engineering.

Bachelor of Science in Technology, Tampere University (2018-2021)

Biotechnology, major in devices and systems, minor in software engineering.

Projects

Usability testing of SisU, Tampere University

Usability evaluation and testing of the SisU information service for Funidata Oy

InnoEvent 2019, TUNI

Solution for the reuse of cardboard and wood waste for KONE Oyj
